

VEINSIGHT

V5500

Lighter, Smaller
and Smarter
Vein Finder

reddot winner 2020
innovative product

VEINSIGHT™ vein finder digitally displays a map of the veins on the surface of the skin in real time, aiding healthcare professionals to verify vein patency. VEINSIGHT™ is a proven modality that can improve patient care and save valuable time for both clinicians and patients.

As one of the most advanced vein finders on the market, VS500 has many unique features that improve the using experience.

Distance Sensing Technology Wave Hands to Wake Up VS500

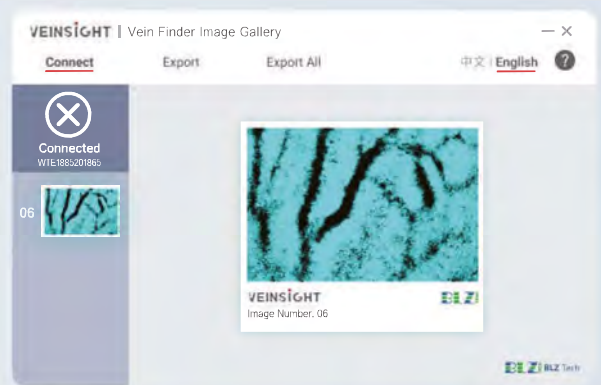

VS500 has an inbuilt distance sensing feature which will enable the end user to adapt the device to the optimal distance to identify the veins.

Saving Real Time Vein Image Exporting to Computer

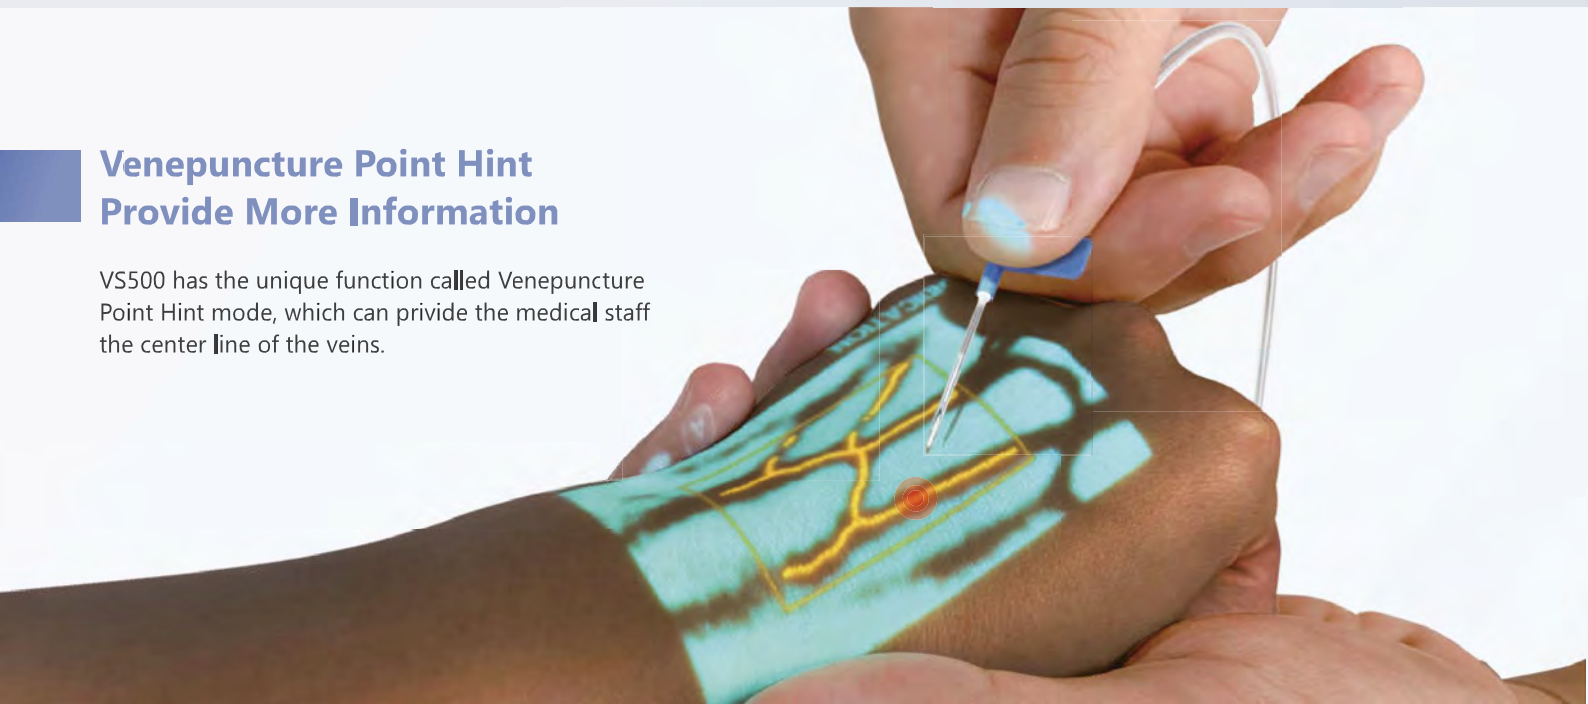

VS500 can save images in real time, and export all saved images to a laptop or computer.

Venepuncture Point Hint Provide More Information

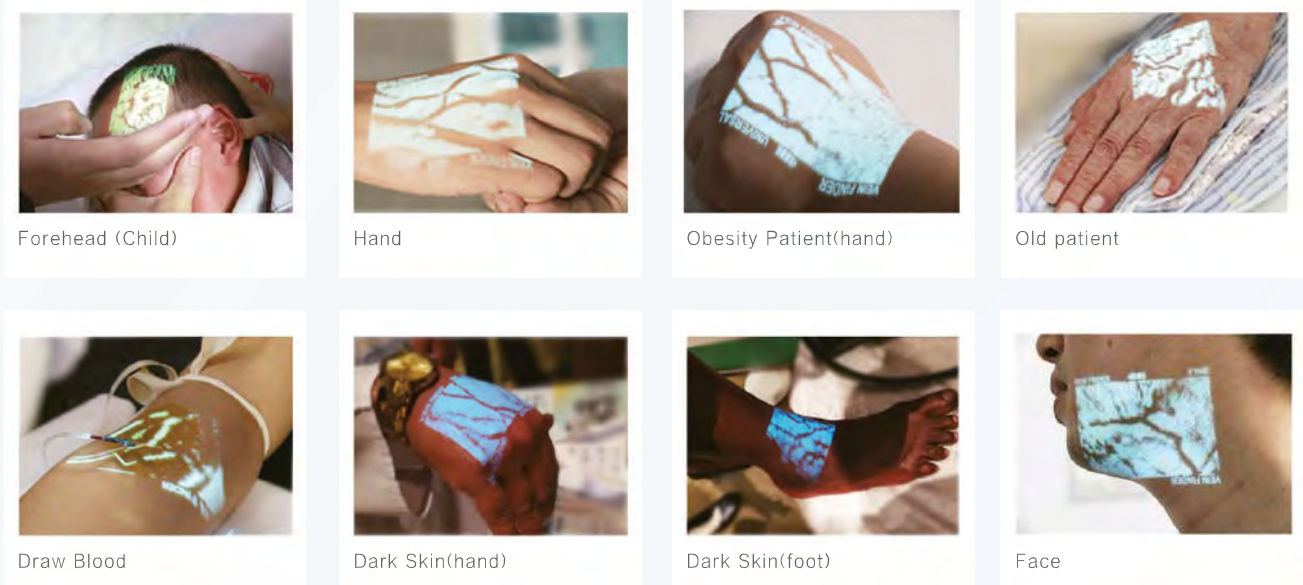

VS500 has the unique function called Venepuncture Point Hint mode, which can provide the medical staff the center line of the veins.

Stand is essential in the daily use of vein finder, it can help free both hand for the medical staff.
